Objective

Motivated B.Tech student in Computer Science (AI & ML) with a strong foundation in Java, SQL, software development, and problem-solving. Passionate about learning new technologies and applying technical knowledge to develop efficient solutions for real-world problems. Seeking an opportunity to contribute to an organization, enhance my skills, and grow professionally while delivering meaningful results.

Education

B.Tech in CSE (AI & ML), Keshav Memorial Institute of Technology	2023 – 2027
Hyderabad	CGPA: 7.93 (Present)
Intermediate, Sree Chaitanya Junior College	2021 – 2023
Karimnagar	Percentage: 98.5%
SSC, Mother Teresa High School	2020 – 2021
Luxettipet	GPA: 10.0

Skills

Programming Languages: Java, C

Web Technologies: HTML5, CSS3, React.js, Node.js, Express.js, REST APIs

Database: MySQL

Tools: Git, GitHub, VS Code, MS Office, Flutter

Core Concepts: Object-Oriented Programming (OOP), DBMS, OS, Cloud Computing

Soft Skills: Communication, Team Collaboration, Quick Learning, Analytical Thinking

Projects

AI Powered Text Digitisation App Mobile Application [GitHub]

- Developed a mobile application to digitize handwritten medical records into structured Electronic Medical Records (EMRs).
- Implemented OCR-based text extraction and integrated backend APIs for secure data storage.
- Designed the application to improve the efficiency and accuracy of converting handwritten records into digital formats.
- Technologies: Dart, JavaScript, MySQL, Google ML Kit

FixItNow Web-based Application [GitHub]

- Developed a full-stack service booking web application connecting customers with service providers.
- Implemented user authentication, backend APIs, and database integration using Node.js and MySQL.
- Designed a user-friendly platform to streamline service booking and management between customers and service providers.
- Technologies: HTML, CSS, JavaScript, Node.js, Express.js, MySQL

Conversational AI for Instant Business Intelligence Dashboards Web Application [GitHub]

- Developed an AI-powered web application that converts natural language into SQL queries for dashboard generation.
- Built interactive dashboards using Chart.js with real-time visualization.
- Implemented CSV upload and backend integration for dynamic data analysis.
- Enabled users to analyze uploaded datasets through natural-language queries without requiring manual SQL knowledge.
- Technologies: React.js, FastAPI, SQLite, Chart.js, JavaScript, HTML, CSS

Certificates

- SQL (Basic) HackerRank [Certificate]
- Artificial Intelligence Infosys Springboard [Certificate]
- GeeksforGeeks Hackathon Participation [Certificate]

Interests

Software Engineering, Full Stack Development, Artificial Intelligence, Problem Solving, Database Technologies, Exploring Emerging Technologies
